

Friday 27th March

Morning Clover Class,

Last 'Home Learning' day of the week, I hope that you have enjoyed it. I've certainly enjoyed seeing all of your lovely work so a big thank you! Perhaps those who have not sent me anything to look at could send me over something today? A photo would be fine.

Here is your work for today:

Year 2/3

Yr2 Spellings – draw and spell compound word game

Choose someone to play with. Pick a compound word and try to draw a picture of it. A point to you if your opponent guesses it (means that you have drawn a great picture!). Can you guess this one?

Yr3 Spellings – Spelling challenge

Ask someone to test you on your 'y' spellings from this week's word list. Good luck!

Writing – Character description

Carry on with your character description, have a go at another character description from the book or perhaps a completely different character from a favourite book of yours.

(Now, normally we would do this over a couple of English sessions so your work for today and tomorrow is to take one or more of the characters Belinda, Harry or George and write a character description.

Below is the plan that we used when we were writing a character description of Flat Stanley back before Christmas which might help you.

Don't forget to use all the ideas that everyone has posted on the blog as well.

How about also adding a picture?

Flat Stanley

What a unique character Stanley is! Surprisingly though, he was a normal little boy until the moment a notice board fell on him leaving him measuring just four feet tall and only an inch thick!

Looks paragraph...

Personality paragraph...

Ending...

I would really like to meet Stanley because... and the three words that I would use to describe Stanley are...

Reading – try to read for at least 10 minutes to an adult

Yr2 Maths – 3D shapes

Remind yourself of as many of the 3D shape names as you can. Have a go at the attached colouring shape sheets or if you can't print, why not draw a picture of your own using 2D shapes?

Yr3 Maths – 3D shapes

I'd like you to describe four 3D shapes to someone. Don't forget to include the name of the shape, number of edges, vertices and faces if you can. You could use the 3D word mat to help if you want to. Now have a go at the 3D challenge cards – you are going to have to be inventive for this one! Maybe use spaghetti, small sticks from your garden, strips of strong card or you may have a better idea. For those of you that can print I've also attached some 3D nets for you to have a go at making.

Enjoy your learning today, have a lovely weekend and see you all again on Monday. Mrs Hannam
